Sell Smarter with AI

Marketing for Pinaypreneurs

WISE Program · Kabankalan City
On-demand course · October 2026

Dr Akira Murata

From zero to ready-to-sell in 7 minutes

07:00

One real product. One phone. Seven minutes.

- **Everything you see next, you will do yourself in this course.**

DEMO

Six steps, one phone

1. Customer
2. Promise
3. Facebook post
4. Poster
5. Sales table
6. Typhoon message

AI-generated image

What you just saw

1

Customer profile

Task 1

2

One-sentence promise

Task 2

3

Facebook post + poster

Task 3

4

Messenger replies

Task 3

5

Sales table from a notebook

Task 4

6

Typhoon messages

Task 5

Six tools for your business in one course.

By the end of this course, this is you

BEFORE

2–3 hours

of writing, counting and worrying

→

AFTER

About 7 minutes

with AI, plus your own checking

- **AI does the first draft. You stay the boss.**

Meet Ate Lorna

Lorna, 42

1. Makes piaya and pasalubong at home
2. Lives with two children and her mother
3. Sells through Facebook and neighbours

Good products are not enough. Customers must find you, trust you and come back.

Lorna's problem

1. **Sales dropped by half after MassKara**
2. **A cheaper seller opened nearby**
3. **Few likes on her Facebook posts**
4. **Ashfall kept customers away for a week**

Photo: Dr Akira Murata, New Bacolod-Silay Airport, October 2026

Many of us face the same problems.

Three questions for this course

1. Why do customers buy from me — or walk away?
2. Who are my best customers, and why should they choose me?
3. How can AI help me sell, get paid and keep selling — even after a typhoon?

- **We will answer them for Lorna — and for you — at the end.**

Your goals = the six things you just saw

1. **Know your customer**
2. **Stand out**
3. **Post and reply**
4. **Get paid and keep records**
5. **Keep selling after a disaster**
6. **Use AI safely**

Six skills, one stronger business.

Our map

You are here

1. **Opening**
2. Know your customer
3. Choose and stand out
4. Tell and sell
5. Get paid and keep records
6. Keep selling when disaster hits
7. Use AI safely
8. My 30-day plan

- **Each part ends with something you can use tomorrow.**

What did the AI just do?

1. AI is a smart helper that writes and answers
2. Free on your phone: ChatGPT, Gemini, Meta AI in Messenger, Canva
3. It can be wrong — you saw one mistake

AI is a helper, not a boss.

2

PART 2 · KNOW YOUR CUSTOMER

Why do people buy?

AI-generated image

What happens in the customer's head

1

What she sees

Product, price, place, post

→

2

What she thinks and feels

→

3

What she does

Buy, ask, ignore

- **The same post makes different people react differently.**

Four things that shape every purchase

1 Culture

Pasalubong, fiesta, Christmas, Holy Week

2 Family and friends

Suki, word of mouth, Facebook groups

3 Personal

Budget, payday (15th and 30th), age, work

4 Feelings

Trust, pride, fear of being cheated

Know these four, and you know why people buy.

Why do people buy Lorna's piaya?

1	A balikbayan buys it as pasalubong	Culture
2	A neighbour buys because a friend posted it	Family and friends
3	An office worker buys on payday	Personal
4	A mother buys because it is clean and home-made	Feelings

Different customers, different reasons.

Five steps before a sale

1

Need

ON FACEBOOK

Sees a post

2

Search

ON FACEBOOK

Checks your page

3

Compare

ON FACEBOOK

Compares prices and reviews

4

Buy

ON FACEBOOK

Messages you and pays by GCash

5

After the sale

ON FACEBOOK

Posts a photo or comes back

Help your customer at every step.

Where do you lose customers?

1. Slow replies
2. No price in the post
3. No photos
4. No GCash option
5. No follow-up

Fix the weakest step first.

ACTIVITY

AI Task 1: Build your customer profile

Pause · 10–15 min

PROMPT

#role	You are a friendly marketing helper for small sellers in the Philippines.
#context	I sell **[product]** in **[city/barangay]**, Negros Occidental, Philippines. My price is **[price]**. Most of my customers are **[who buys now]**.
#task	Describe my 2 best customer types: who they are, why they buy, when they buy (payday, fiesta, holidays), and where they see my products online. Also list 3 reasons they might NOT buy from me.
#style	Simple English.
#example	*Office workers near the town plaza. They buy lutong bahay for lunch on payday. They see my posts in the barangay Facebook group.*
#example	*Young mothers in my barangay. They buy baby clothes and household items from me on the 15th and 30th. They find me in a local buy-and-sell Facebook group.*

AI drafts, you decide.

3

PART 3 · CHOOSE AND STAND OUT

Who should I serve?

AI-generated image

You cannot sell to everyone

1

Group

Who buys?

2

Choose

Whom will I serve best?

3

Stand out

Why me?

- **Choose your customers before you choose your words.**

Group your customers

1 By place

Barangay, office, school

2 By occasion

Pasalubong, birthday, fiesta

3 By budget

4 By need

Fast delivery, healthy, gift-ready

Customers are not all the same.

Choose your best group

1

Big enough?

2

Can pay?

3

Can you reach them?

EXAMPLE

Lorna chooses balikbayan families and office workers.

- **Serve the group you can serve best.**

Why should they choose you?

1. **Taste and quality**
2. **Your story** (“my lola’s recipe”)
3. **Service** (free barangay delivery)
4. **Packaging** (gift-ready)
5. **Trust** (clean kitchen, permits)

- **Low price is easy to copy. Your story is not.**

Your one-sentence promise

TEMPLATE

For **[customer]** who want **[need]**, my **[product]** gives **[benefit]**, unlike **[others]**, because **[reason]**.

EXAMPLE

“For families going abroad, my piaya is a gift-ready taste of Bacolod, made fresh the same day with my lola’s recipe.”

- **One clear sentence sells better than ten posts.**

ACTIVITY

AI Task 2: Your promise and product description

Pause · 10–15 min

PROMPT

#role	You are a friendly marketing helper who writes short, warm product words.
#context	My product: **[product]**. My best customers: **[from Task 1]**. What makes me different: **[taste / recipe / service / packaging / trust]**.
#task	Write 3 versions of one sentence that says why these customers should buy from me. Then write a short product description (50 words) for Facebook.
#style	Simple English and Hiligaynon.
#example	*For families going abroad, my piaya is a gift-ready taste of Bacolod, made fresh the same day with my lola's recipe.*
#example	*For office workers who want a strong morning cup, my native coffee gives a fresh, rich taste, unlike instant coffee, because I roast it myself every week.*
#example	*For families who want natural, safe oil, my PGS-certified organic virgin coconut oil is cold-pressed from our own Kabankalan coconuts, unlike ordinary cooking oil, because we follow organic rules every season.* (Only if certified)

AI drafts, you decide.

4

PART 4 · TELL AND SELL

How do I reach them every week?

AI-generated image

The 4 Ps in your phone

P

Product

Clear photos

P

Price

Always show it

P

Place

Delivery, pick-up, Messenger orders

P

Promotion

Posts, stories, groups, reviews

Your phone is your shop window.

A good post has five parts

1. Hook
2. Photo
3. Price
4. How to order
5. A reason to act now (“only 20 boxes today”)

1 **[Hook]**

2

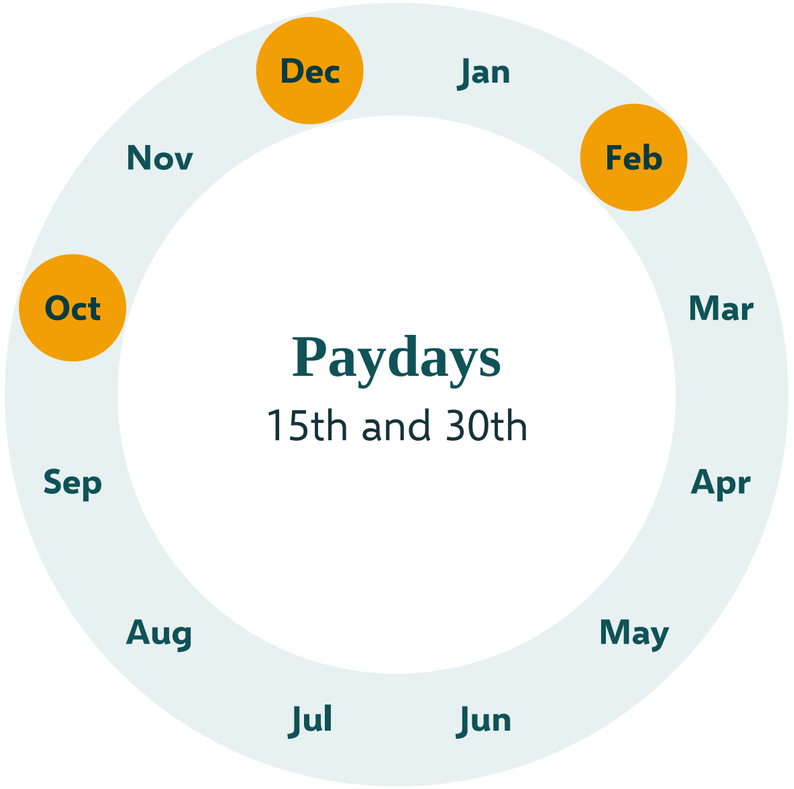

3 ~~₱~~**[price]**

4 **[How to order]**

5 **Only 20 boxes today**

No price, no sale.

Plan around the local calendar

15 · 30	Paydays (15th and 30th)
Oct	MassKara
Dec	Christmas and balikbayan season
Feb	Valentine's

Holy Week · Back to school · Typhoon season

Sell when your customers are ready to buy.

Fast replies win sales

1

Save reply templates for price, delivery, payment and “sold out”

Price Delivery Payment Sold out

2

Use Messenger saved replies and labels

- **Answer within minutes, not hours.**

ACTIVITY

AI Task 3: Post, picture idea and replies

Pause · 10–15 min

PROMPT

#role	You are a Facebook and Messenger helper for a small home business.
#task	Write a Facebook post for my **[product]** for **[occasion, e.g. payday / Christmas]**.
#constraint	Include: a short hook, the price **[price]**, how to order (Messenger), payment by GCash, and a reason to order today.
#tone	Use simple Taglish or Hiligaynon.
#output	Add 3 hashtags. Then suggest one photo idea I can take with my phone. Then write 4 short Messenger replies for: price question, delivery question, payment confirmation, and "sold out today".
#example	*Pure virgin coconut oil, made in Negros! ₱**[price]** per bottle. Message us to order, pay by GCash. Only 10 bottles left today! #VCO #NegrosMade*
#example	*Payday pizza night! Homemade pizza, ₱**[price]** per box. Message us before 3 pm, pay by GCash. Only 15 boxes today! #PaydayTreat*
#example	*Certified organic virgin coconut oil from our farm in Negros! ₱**[price]** per bottle. Message us to order, pay by GCash. Only 20 bottles this week! #OrganicNegros* (Only if certified)

AI drafts, you decide.

Before you post: three checks

1. Is the price and information correct?
2. Does it sound like me?
3. Did I avoid promises I cannot keep (for example, “cures diabetes”)?

- **Your name is on every post.**

Halfway wrap-up

Lorna now knows her best customers, has a promise and a post.

BEFORE YOU GO ON

Use AI once for a real sale. Then come back for the next part.

- **One small try now. One big step next.**

Welcome back! What did you try?

Think back:

1

What did you try?

2

What worked?

3

What did not?

- **Everyone starts somewhere.**

5

PART 5 · GET PAID AND KEEP RECORDS

How do money and records build trust?

AI-generated image

Make paying easy

1

GCash or Maya QR at your table and in every post

2

Confirm payment by screenshot

3

Give a simple receipt

Easy to pay, easy to buy again.

Separate business money from house money

1

Business money

2

House money

Two wallets — for example two e-wallet accounts, or one e-wallet plus a cash box

Pay yourself a fixed amount.

- **If you mix the money, you cannot see your profit.**

A simple sales record

NOTEBOOK

Date · Item · Quantity · Price · Paid by · Customer

→

Date	Item	Quantity	Price	Paid by (cash or GCash)	Customer (optional)

In a notebook or Google Sheets.

Five minutes a day keeps your business clear.

Your records are your collateral

Regular e-wallet payments and sales records show lenders and insurers that your business is real and steady — even without a land title.

- **Good records open doors to better loans.**

ACTIVITY

AI Task 4: From notebook to table

Pause · 10–15 min

PROMPT

#role	You are a careful bookkeeping helper for a small business.
#context	**[Attach a photo of one page of my sales notebook, or paste the lines.]**
#task	Turn this into a table with columns: date, item, quantity, price, total, paid by.
#output	Then tell me in 3 short sentences: total sales this week, my best-selling item, and one simple idea to improve.
#example	*Example row: 24 Oct | local chips | 5 | 50 | 250 | GCash* (Sample only)
#example	*Example row: 25 Oct | peanut butter jar | 4 | 120 | 480 | cash* (Sample only)

AI drafts, you decide — check every number.

6

PART 6 · KEEP SELLING WHEN DISASTER HITS

What if a typhoon or ashfall closes my store?

AI-generated image

Disaster hits marketing too

1. **Customers stay home**
2. **Roads close**
3. **Power and signal drop**
4. **Stock is damaged**

EXAMPLE · Fictional example

Lorna during the October 2026 Kanlaon ashfall — no walk-in customers for a week.

- **Plan your sales before the storm, not during it.**

Five marketing moves for continuity

1. Back up your customer list outside your phone
2. Keep “open / closed” messages ready
3. Offer delivery or pre-orders
4. Sell what people need now
5. Partner with other sellers for delivery

A ready message is faster than a worried one.

ACTIVITY

AI Task 5: My “still open” message plan

Pause · 10–15 min

PROMPT

#role	You are a calm message helper for a small business during a disaster.
#context	I sell **[product]** in **[place]**. A **[typhoon / ashfall]** warning is coming.
#task	Write 3 short messages for my Facebook page and Messenger customers: (1) before: stock up / pre-order, (2) during: closed or delivery only, stay safe, (3) after: we are open again.
#style	Use simple English and Hiligaynon.
#constraint	Do not give any safety advice that is not from PAGASA or PHIVOLCS.
#example	*(During) Our store is closed today because of ashfall. Delivery only in our barangay. Message us. Stay safe!*
#example	*(Before) Typhoon warning! Pre-order rice, canned goods and water today. We deliver in our barangay until tomorrow noon.*

AI drafts, you decide.

Meet HANDA — the DOST–PHIVOLCS preparedness platform

`handa.georisk.gov.ph`

1

Ask a preparedness question

→

2

See an official advisory turned into actions for your business

- **Follow official PAGASA and PHIVOLCS advisories first. AI helps you act on them.**

7

PART 7 · USE AI SAFELY

When should I not trust AI?

AI-generated image

AI can be wrong

It can invent prices, laws, numbers and facts — and sound sure.

Always check:

- numbers
- names
- dates
- health claims
- legal rules

Sounding sure is not the same as being right.

Spot the mistake

Three AI answers. Each has one hidden mistake. Can you find it?

AI ANSWER 1

?

AI ANSWER 2

?

AI ANSWER 3

?

Checking is a skill. Practise it.

Protect your customers' data

Do not paste full names, phone numbers, addresses or GCash numbers into AI

Data Privacy Act of 2012:

collect only what you need, keep it safe.

Your customers trust you with their information.

AI is free — your time is not

1

Use AI for tasks you repeat: posts, replies, records

2

Start with one task a week.

- **Save time for your family and your business.**

ACTIVITY

AI Task 6: My 30-day marketing calendar

Pause · 10–15 min

PROMPT

#role	You are a simple marketing planner for a small business.
#task	Make a 30-day Facebook plan for my **[product]** starting **[date]**, for **[best customers]**.
#constraint	Include 8 posts and 2 promotions. Use paydays (15th and 30th), Christmas season, and one customer story or review.
#output	Show it as a table: date, post idea, picture idea.
#example	*Example row: 15 Nov | Payday lunch trays for offices | Photo of a full tray on the table*
#example	*Example row: 30 Nov | Payday sale: Christmas gift sets | Photo of gift sets on a red cloth*

A plan turns good ideas into sales.

Answers for Lorna

Q1

Why do customers buy from me — or walk away?

Customers buy for culture, family, budget and trust; she lost them with slow replies and no GCash.

Q2

Who are my best customers, and why should they choose me?

Her best customers are balikbayan families and office workers; her promise is a gift-ready, same-day fresh taste of Bacolod.

Q3

How can AI help me sell, get paid and keep selling — even after a typhoon?

AI writes her posts and replies, turns her notebook into records, and helps her keep selling after a disaster.

Lorna's answers can be your answers.

Your answers

Write your own answers to the three questions on paper.

1. Why do customers buy from me — or walk away?
2. Who are my best customers, and why should they choose me?
3. How can AI help me sell, get paid and keep selling — even after a typhoon?

Your plan, your words, your business.

Three things to remember

1

Know your customer

2

Stand out with one promise

3

Let AI help — and always check it

- **AI drafts, you decide.**

Thank you / Salamat gid!

Dr Akira Murata **a.murata.hf@juntendo.ac.jp**
